

DESCRIPTION

CFL-114 is a retarding, low fluid loss cement additive for use above 180°F circulating temperature. It is particularly useful for deep liners, where low fluid loss, turbulent flow and long thickening times are generally required. **CFL-114** is compatible with all API cements and commonly used additives for high temperature conditions.

APPLICATION

Dosage rates vary from 0.5 to 2.0% depending on the desired slurry properties.

PHYSICAL PROPERTIES

Appearance

Light Tan Powder

PACKAGING

Supplied in 25kg sacks

ADDITIONAL INFORMATION

None
