

### DESCRIPTION

**CFL-622** is a very effective fluid loss control agent that is effective at a wide range of temperatures from 60 to 300°F in most types of cement slurry.

**CFL-622** is compatible with all classes of cement and a wide variety of typical additives making it a very versatile product.

### APPLICATION

**CFL-622** can be added to the mix water or dry blended with the cement at concentrations between 0.25 and 2.0% BWOC.

### PHYSICAL PROPERTIES

Physical Appearance	Red/brown powder
Odour	Characteristic
Bulk Density	646kg/m <sup>3</sup>
Solubility in water	400g/l @20°C

### PACKAGING

Supplied in 25kg sacks

### ADDITIONAL INFORMATION

None
